

In order to assist our Resellers to promote Server8 products in an efficient way BrainBox has devised a system of co-marketing on GoogleAdWords.

With the first purchase of one or more OEM products, BrainBox will activate a pre-credited GoogleAdWords account to promote our partner's Server8 products on the market.

The GoogleAdWords account will be jointly managed by the Reseller and our marketing sector during the first year, and our partner will have full access to all the GoogleAdWords functions.

For the first year all purchases of OEM products will give credits as shown in the following table:

The campaign will be created by the Reseller and our marketing sector with the aim of maximising the promotion of the Reseller's pages where Server8 products are sold.

At the end of the first year at the request of the Reseller the account can be cancelled or transferred to the full control of the Partner.
